Tree Inventory and Preservation Plan

Milton Link

Milton, ON

Prepared for:
Matthews
c/o Tribal Development Management Services Inc.
201-2700 Steeles Avenue West
Vaughan, Ontario L4K 3C8

17 June 2026

Kuntz Forestry Consulting Inc. P4917

Executive Summary

The subject site is over 200 ha of land situated in the Town of Milton, Ontario, bounded by Britannia Road to the north, Highway 25 to the east, No. 2 Side Road to the south, and Tremaine Road to the west. The entire site is located within "Rural Area" by the Town of Milton Official Plan (2026). Majority of the site is currently occupied by rural residential lots and agricultural farmland. Several Local Natural Heritage Systems are identified throughout the subject site. A large number of trees exist on the subject site as hedgerows, landscape trees, and naturalized trees along creek including Natural Heritage Systems.

The development is proposed on the subject site to construct eleven industrial buildings with associated driveways and parking lots. The existing Natural Heritage Systems, including woodlots and ravine areas will be protected with buffer zones. Kuntz Forestry Consulting Inc. (KFCI) conducted the tree survey and identified 48 trees species, 943 individual trees and 16 tree polygons on and within six metres of the limit of disturbance. The removal of 463 individual trees and 10 tree polygons is required to accommodate the proposed development. The remaining 475 individual trees and 6 tree polygons will be protected.

Introduction

The Proponent, Tribal Development Management Services Inc. (doing business as "Matthews"), is advancing the development of lands located adjacent to the CN Logistics Hub in the Town of Milton. Official Plan and Zoning By-law Amendments are being pursued to designate the subject lands as Industrial Area to be included within the Sustainable Halton Plan (SHP) Urban Area Boundary. The site will seek the entitlements associated with the Employment Zone, with site-specific provisions to support the intended development.

The work plan for this tree preservation study included the following:

- Prepare inventory of the tree resources greater than 15cm DBH on and within six metres of the proposed work and trees of all sizes within the road right-of-way.
- Evaluate potential tree saving opportunities based on proposed development plans; and
- Document the findings in a Tree Inventory and Preservation Plan Report.

The results of the evaluation are provided below.

Methodology

Trees greater than 15cm DBH on and within six metres of the proposed work and trees of all sizes within the road right-of-way were included in the inventory. Trees were located using a handheld GPS unit accurate to $\pm 1\text{m}$. Trees inventoried were tagged with numbers 342-434, 501-689, 701-711, 746-899, and 1031-1500. Trees on the adjacent private properties and trees that could not be tagged were identified with letters A-Z and AA-AB. Naturally growing trees smaller than 10cm DBH within the road right-of-way and groups of trees within the adjacent properties were assessed as polygons P-1 to P-16. The dripline distance plus one metre was primarily used in the preservation planning analysis to determine the preservation potential of inventoried trees. Where development is proposed within a dripline plus one metre, there is the potential to damage tree roots and tree removal may be required. See Figures 1-11 for the locations of trees and Tables 1 and 2 for the results of the inventory.

Tree resources were assessed utilizing the following parameters:

Tree # - number assigned to tree that corresponds to Figures 1-11.

Species - common and botanical names provided in the inventory table.

DBH - diameter (centimetres) at breast height, measured at 1.4 m above the ground.

Condition - condition of tree considering trunk integrity, crown structure and crown vigour. Condition ratings include poor (P), fair (F) and good (G).

Crown Dieback – percentage of dead branches within the crown.

Dripline – crown radius (m)

Comments - additional relevant detail.

Table 3 below is the summary of trees and Figures per phase.

Table 3. Trees and Figures per Phase

	Figures	Tree Numbers	Total Number of Trees
Phase 1	1-3	746-774, 1031-1088, 1201-1351, A, E, F, P-1, P-2, P-3, P-4	241 individual trees 4 tree polygons
Phase 2	3-5	828-899, 1352-1409, P-5	130 individual trees 1 tree polygon
Phase 3	6-9	610-689, 701-711, 775-827, 1089-1200, 1410-1500, B-D, G, Z, AA, AB, P-6, P-7, P-8, P-9, P-10, P-11, P-12	354 individual trees 7 tree polygons
Phase 4	10-11	342-434, 501-609, H-Y, P-13, P-14, P-15, P-16	218 individual trees 4 tree polygons
TOTAL	1-11	-	943 individual trees 16 tree polygons

Existing Site Conditions

The subject properties are currently occupied by rural residential houses, farmland, and associated amenity areas. Tree resources exist in the form of landscape trees and natural generation. Refer to Figures 1-11 for the existing conditions.

Tree Resources

The tree inventory was conducted on 27 January 2026, 3 February 2026, 9 February 2026, 24 March 2026, 27 March 2026, 9 April 2026, and 14 May 2026. The inventory documented 943 individual trees and 16 tree polygons with potential to be impacted. Refer to Table 1 for the full tree inventory and Figures 1-11 for the locations of trees reported in the tree inventory.

Tree resources included in the inventory are comprised of White Fir (*Abies concolor*), Hedge Maple (*Acer campestre*), Manitoba Maple (*Acer negundo*), Norway Maple (*Acer platanoides*), Red Maple (*Acer rubrum*), Silver Maple (*Acer saccharinum*), Sugar Maple (*Acer saccharum*), Horsechestnut (*Aesculus hippocastanum*), Serviceberry species (*Amelanchier spp.*), White Birch (*Betula papyrifera*), Bitternut Hickory (*Carya cordiformis*), Shagbark Hickory (*Carya ovata*), Northern Catalpa (*Catalpa speciosa*), Weeping Nootka Cypress (*Chamaecyparis nootkatensis 'Pendula'*), Hawthorn species (*Crataegus sp.*), Russian Olive (*Elaeagnus angustifolia*), Green Ash (*Fraxinus pennsylvanica*), Shademaster Honey Locust (*Gleditsia triacanthos 'inermis'*), Kentucky Coffeetree (*Gymnocladus dioica*), Black Walnut (*Juglans nigra*), Eastern Red Cedar (*Juniperus virginiana*), Apple species and Crabapple (*Malus sp.*), White Mulberry (*Morus alba*), Norway Spruce (*Picea abies*), White Spruce (*Picea glauca*), Blue Spruce (*Picea pungens*), Austrian Pine (*Pinus nigra*), Scots Pine (*Pinus sylvestris*), Grey Poplar (*Populus x canescens*), Eastern Cottonwood (*Populus deltoides*), Largetooth Aspen (*Populus grandidentata*), Poplar species (*Populus sp.*), Trembling Aspen (*Populus tremuloides*), Black Cherry (*Prunus serotina*), Flowering Cherry (*Prunus serrulata*), Douglas Fir (*Pseudotsuga menziesii*), Pear species (*Pyrus sp.*), White Oak (*Quercus alba*), Swamp White Oak (*Quercus bicolor*), Bur Oak (*Quercus macrocarpa*), Red

Oak (*Quercus rubra*), Black Locust (*Robinia pseudoacacia*), Willow species (*Salix sp.*), Eastern White Cedar (*Thuja occidentalis*), Basswood (*Tilia americana*), Little-leaf Linden (*Tilia cordata*), White Elm (*Ulmus americana*), and Siberian Elm (*Ulmus pumila*).

Proposed Development

The proposed development includes the construction of eleven (11) warehouse buildings with associated surface parking and driveways, and stormwater management ponds. Refer to Figure 1 for the proposed site plan.

Discussion

The following sections provide a discussion and analysis of development impacts, tree removal requirements, and tree preservation relative to the proposed development and existing conditions.

Development Impacts/Tree Removals

The removal of 463 individual trees and ten (10) tree polygons is required to accommodate the proposed development. Required tree removals are shown below in Table 4. All trees that require removal have direct conflicts with the proposed buildings, parking, the driveways, and re-grading.

Table 4. Tree Removals Per Phase

	Trees for Removal	Total Number of Trees for Removal
Phase 1	752, 757-759, 765-774, 1072-1075, 1239, 1240, 1328-1351, E, F, P-1, P-2, P-4	46 individual trees 3 tree polygons
Phase 2	828-835, 887-899, 1352-1361, 1363-1409, P-5	78 individual trees 1 tree polygons
Phase 3	610-689, 701-711, 780, 786, 787, 790, 805, 809, 814, 817, 819, 1100-1112, 1123-1132, 1136-1198, 1410-1415, 1435, 1444-1500, B, G, P-6, P-7, P-8, P-9, P-10, P-12	252 individual trees 6 tree polygons
Phase 4	346-407, 417-426, 428, 572, 590-603	87 individual trees 0 tree polygons
TOTAL		463 individual trees 10 tree polygons

The removal of additional three trees including Trees 1135 (Phase 3), 1280 (Phase 1), and 1306 (Phase 1) is recommended as they are in poor and/or hazardous conditions and in proximity to the proposed development. Dead trees were not inventoried; however, their locations are surveyed and shown on Figures 1-11. The removal of dead trees within proximity is recommended due to safety concerns.

Refer to Figures 1-11 for the proposed tree removals and Table 4 below for the list of trees that require removal per phase.

Tree Preservation

The preservation of the remaining 475 individual trees and six (6) tree polygons will be possible with the use of appropriate tree protection measures as indicated on Figures 1-11.

The Town of Milton requires tree protection fencing to be installed at the dripline plus one metre of a tree. Refer to Figures 1-11 for the location of the dripline plus one metre of inventoried trees. Although this level of protection cannot be respected for some trees, these trees are afforded minimum tree protection zones (mTPZs) that are consistent with standards utilized by surrounding municipalities.

The minimum tree protection zones (mTPZs) are based on the trunk diameter of the tree as follows:

Diameter at Breast Height (cm)	Minimum Tree Protection Zone (m) (from edge of stem)
<10	1.2
10 – 29	1.8
30 – 40	2.4
41 – 50	3.0
51 – 60	3.6
61 – 70	4.2
71 – 80	4.8
81 – 90	5.4
91 – 100	6.0
101 – 110	6.6
111 – 120	7.2
121 – 130	7.8
131 – 140	8.4

Tree protection measures will have to be implemented prior to construction to ensure tree resources designated for retention are not impacted. Refer to Figures 1-11 for the location of required tree preservation fencing, general Tree Protection Plan Notes, and the tree preservation fence detail.

Summary and Conclusions

Kuntz Forestry Consulting Inc. was retained by Tribal Development Management Services Inc. to complete a Tree Inventory and Preservation Plan Report for the proposed development located adjacent to the CN Logistics Hub in the Town of Milton, Ontario. A tree inventory was conducted and reviewed in the context of the proposed development plan.

The findings of the study indicate **a total of 943 individual trees and 16 tree polygons** on and within six metres of the proposed development. The **removal of 463 individual trees and 10 tree polygons** is required to accommodate the proposed development. **The removal of additional 3 trees** is recommended due to poor and/or hazardous conditions. The remaining **475 individual trees and 6 tree polygons can be saved** provided appropriate tree protection measures are

installed prior to construction. Refer to Table 5 below for the breakdown of tree removals and preservation per phase.

Table 5. Summary of Tree Removals and Preservation

Summary	Removal		Removal (condition)		Preservation		TOTAL	
	Individual	Polygons	Individual	Polygons	Individual	Polygons	Individual	Polygons
Phase 1	46	3	2	0	193	1	241	4
Phase 2	78	1	0	0	52	0	130	1
Phase 3	252	6	3	0	99	1	354	7
Phase 4	87	0	0	0	131	4	218	4
TOTAL	463	10	5	0	475	6	943	16

The following recommendations are suggested to minimize impacts to trees identified for preservation. Refer to Figures 1-11 for additional tree preservation notes and the preservation fence detail.

- Tree protection barriers and fencing should be erected at distances as prescribed on Figures 1-11.
- Tree protection measures will have to be implemented prior to construction to ensure the trees identified for preservation are not impacted by the development.
- Branches and roots that extend past prescribed tree protection zones that require pruning must be pruned by a qualified Arborist or other tree professional. All pruning of tree roots and branches must be in accordance with good arboricultural standards.
- Site visits, pre, during and post construction are recommended by either a certified consulting arborist (I.S.A.) or registered professional forester (R.P.F.) to ensure proper utilization of tree protection barriers. Trees should also be inspected for damage incurred during construction to ensure appropriate pruning or other measures are implemented.

Limitations of Assessment

Only the tree(s) identified in this report were included in the inventory. The assessment of the trees presented in this report has been made using accepted arboricultural techniques. These may include a visual examination taken from the ground of all the above-ground parts of the tree for structural defects, scars, external indications of decay such as fungal fruiting bodies, evidence of attack by insects, discoloured foliage, the condition of any visible root structures, the degree of lean (if any), the general condition of the trees and the identification of potentially hazardous trees or recommendations for removal (if applicable). Where trees could not be directly accessed (ie. due to obstructions, and/or on neighbouring properties), trees were assessed as accurately as possible from nearby vantage points.

Locations of trees provided in the report are determined as accurately as possible based on the best information available. If official survey information is not provided, tree locations in the report may not be exact. Where KFCI's in-house GPS unit is used (if applicable), tree locations are accurate only to the extent that the technology allows, which can be variable based on satellite available, RTK network / cell coverage, canopy coverage, and/or projection transformation limitations. If trees occur on or near property boundaries, an official site survey may be required to determine ownership utilizing specialized survey protocol to gain precise location.

Furthermore, recommendations made in this report are based on the site plans that have been provided at the time of reporting. These recommendations may no longer be applicable should changes be made to the site plan and/or grading, servicing, or landscaping plans following report submission.

Notwithstanding the recommendations and conclusions made in this report, it must be recognized that trees are living organisms, and their health and vigor constantly change over time. They are not immune to changes in site conditions or seasonal variations in the weather conditions. Any tree will fail if the forces applied to the tree exceed the strength of the tree or its parts.

Although every effort has been made to ensure that this assessment is reasonably accurate, the trees should be re-assessed periodically. The assessment presented in this report is valid at the time of inspection.

343	Bitternut Hickory	<i>Carya cordiformis</i>	23	F-G	F-G	F-G		3.5	4.5	-	Asymmetrical crown (L)	Private	Preserve
344	Red Oak	<i>Quercus rubra</i>	~64	F-G	F	F-G		5.5	6.5	-	Included fence (L), deadwood (M)	Private	Preserve
345	Black Walnut	<i>Juglans nigra</i>	15	G	F	F-G		1.5	2.5	-	Deadwood (M)	Private	Preserve
346	Eastern Cottonwood	<i>Populus deltoides</i>	52.5	F-G	F	F		4.5	5.5	-	Deadwood (M)	Private	Remove
347	Bur Oak	<i>Quercus macrocarpa</i>	77.5	F	P-F	P-F		9	10	-	Asymmetrical crown (H), pruning wounds (H), epicormic shoots (H)	Town	Remove
348	Silver Maple	<i>Acer saccharinum</i>	82.5	P	P-F	P-F		6	7	-	Stem wound (H) with decay, epicormic shoots (H), poor form (H)	Private	Remove
349	Silver Maple	<i>Acer saccharinum</i>	43	F-G	F-G	F-G		9	10	-	Deadwood (L), pruning wounds (L)	Private	Remove
350	Silver Maple	<i>Acer saccharinum</i>	0.39	F-G	F-G	F-G		4	5	-	Pruning wounds (L), epicormic shoots (L)	Private	Remove
351	Silver Maple	<i>Acer saccharinum</i>	.34.5	G	F-G	F-G		3.5	4.5	-	Pruning wounds (L), epicormic shoots (L)	Private	Remove
352	Eastern Cottonwood	<i>Populus deltoides</i>	36	G	F-G	F-G		2.5	3.5	-	Pruning wounds (L), epicormic shoots (L)	Private	Remove
353	Silver Maple	<i>Acer saccharinum</i>	57.5	G	F-G	G		8	9	-	Pruning wounds (L)	Private	Remove
354	Silver Maple	<i>Acer saccharinum</i>	31.5, 24, 21, 17.5	F	F	F		6	7	-	Co-dominance at 0.5m with poor union, cavity (L), epicormic shoots (M)	Private	Remove
355	Silver Maple	<i>Acer saccharinum</i>	49	F	G	F-G		6	7	-	Pruning wounds (M) with decay, crook (L), epicormic shoots (L)	Private	Remove

Tree #	Common Name	Scientific Name	DBH	TI	CS	CV	CDB	DL	DL + 1	mTPZ	Comments	Owner	Action
356	Silver Maple	<i>Acer saccharinum</i>	35.5, 22	F	F-G	F-G		7	8	-	Co-dominance at base with included bark	Private	Remove
357	Silver Maple	<i>Acer saccharinum</i>	27, 25.5, 21.5	P-F	F	P-F		2	3	-	Co-dominance at base, one leader removed, asymmetrical crown (M), 2 dead leaders	Private	Remove
358	Silver Maple	<i>Acer saccharinum</i>	36, 30	F-G	F	F		6	7	-	Co-dominance at 1m, poor form (L), epicormic shoots (M)	Private	Remove
359	Silver Maple	<i>Acer saccharinum</i>	81.5, 28	F	F-G	F		8.5	9.5	-	Inclusion (L), fused leaders, epicormic shoots (M), deadwood (L)	Private	Remove
360	Pear	<i>Pyrus calleryana</i>	18.5, 17	P-F	F	P-F		2.5	3.5	-	Co-dominance at base, 1 leader dead, pruning wounds (M), asymmetrical crown (M)	Private	Remove
361	Bur Oak	<i>Quercus macrocarpa</i>	60	F-G	F	F-G		60	61	-	Asymmetrical crown (M), deadwood (L)	Private	Remove
362	Bur Oak	<i>Quercus macrocarpa</i>	50	G	F	F-G		5.5	6.5	-	Asymmetrical crown (M)	Private	Remove
363	White Mulberry	<i>Morus alba</i>	54.5	P	P	P		2	3	-	Heavy decay in stem, dead leader	Private	Remove
364	Bur Oak	<i>Quercus macrocarpa</i>	56	G	F-G	G		6	7	-	Pruning wounds (L)	Private	Remove
365	Silver Maple	<i>Acer saccharinum</i>	63	P-F	F	P-F		5	6	-	Lean (L), fruiting body (M), asymmetrical crown (M)	Private	Remove
366	Bur Oak	<i>Quercus macrocarpa</i>	70	F	F-G	F-G		8	9	-	Cavity at base with large fruiting body, broken branches (L)	Private	Remove
367	Eastern Cottonwood	<i>Populus deltoides</i>	18, 14	F-G	F	G		1.5	2.5	-	Co-dominance at base, lean (L), asymmetrical crown (M)	Private	Remove
368	Scots Pine	<i>Pinus sylvestris</i>	46	G	F	G		3	4	-	Asymmetrical crown (M)	Private	Remove
369	Scots Pine	<i>Pinus sylvestris</i>	39	F-G	F	F-G		3	4	-	Poor form (M), power lines attached to tree	Private	Remove

Tree #	Common Name	Scientific Name	DBH	TI	CS	CV	CDB	DL	DL + 1	mTPZ	Comments	Owner	Action
370	Scots Pine	<i>Pinus sylvestris</i>	33.5	F	F	F-G		2.5	3.5	-	Crook (L), stem wound (L), asymmetrical crown (M)	Private	Remove
371	Silver Maple	<i>Acer saccharinum</i>	142	P-F	F	F-G		8	9	-	Decay from dead leader, broken branches (M), cavities (H), epicormic shoots (H)	Private	Remove
372	Manitoba Maple	<i>Acer negundo</i>	37, 27.5, 24.5, 20	P-F	P-F	F		6	7	-	Co-dominance at base, stem wound (M), fruiting bodies (M), poor form (M)	Private	Remove
373	Red Maple	<i>Acer rubrum</i>	34.5, 31, 29.5	P-F	F	F-G		4.5	5.5	-	Co-dominance at base with two leaders removed, cavity (H), asymmetrical crown (M)	Private	Remove
374	Willow species	<i>Salix sp.</i>	18, 17	F-G	F	F-G		3	4	-	Asymmetrical crown (M)	Private	Remove
375	Willow species	<i>Salix sp.</i>	33.5, 16	F-G	F-G	F-G		3	4	-		Private	Remove
376	Willow species	<i>Salix sp.</i>	31	G	G	F-G		3.5	4.5	-	Epicormic shoots (L)	Private	Remove
377	Willow species	<i>Salix sp.</i>	37.5	G	G	G		2.5	3.5	-		Private	Remove
378	Eastern Cottonwood	<i>Populus deltoides</i>	26.5, 17	F-G	G	G		2.5	3.5	-	Co-dominance at base	Private	Remove
379	Willow species	<i>Salix sp.</i>	~28, 26, 18, 16	F	F	F		5.5	6.5	-	Co-dominance at base, poor form (M)	Private	Remove
380	White Mulberry	<i>Morus alba</i>	15-Jul	F	F-G	F-G		2	3	-	Stem wound (H)	Private	Remove
381	Black Locust	<i>Robinia pseudoacacia</i>	17	F-G	F-G	F-G		3	4	-	Epicormic shoots (L)	Private	Remove
382	Black Locust	<i>Robinia pseudoacacia</i>	16.5	F-G	F	F-G		2.5	3.5	-	Asymmetrical crown (M), lean (L)	Private	Remove
383	Black Locust	<i>Robinia pseudoacacia</i>	24.5	G	F-G	G		3	4	-	Asymmetrical crown (L)	Private	Remove
384	Eastern Cottonwood	<i>Populus deltoides</i>	~29	P-F	F	F		3.5	4.5	-	Stem wound (H), epicormic shoots (H)	Private	Remove
385	Eastern Cottonwood	<i>Populus deltoides</i>	31	F	F	F		3	4	-	Stem wound (M), epicormic shoots (H)	Private	Remove
386	Eastern Cottonwood	<i>Populus deltoides</i>	~23	P-F	F-G	P-F		3	4	-	Stem wound (H)	Private	Remove
