Introduction

These pages explain the purpose of this Zoning By-law and how it should be used. These pages do not form part of the Zoning By-law passed by *Council* and are intended only to make the Zoning By-law more understandable and easier to reference.

Purpose of This Zoning By-law

The purpose of this Zoning By-law is to implement the policies of the Town of Milton Official Plan. The Official Plan contains general policies that affect the *use* of land throughout the municipality. These policies specify where certain land *uses* are permitted and, in some instances, specify what regulations should apply to the development of certain lands.

The Official Plan is a general document that is not intended to regulate every aspect of the built-form on a private *lot*. In the Province of Ontario, this is the role of the Zoning By-law. Once an Official Plan is in effect, any Zoning By-law passed by *Council* must conform to the Official Plan. For example, if the Official Plan stated that lands in the vicinity of a significant natural feature are to remain in their natural state, the Zoning By-law would prohibit the erection of *buildings* or *structures* on those lands.

The statutory authority to *zone* land is granted by the Ontario Planning Act. The Planning Act specifies what a By-law can regulate. A Zoning By-law can:

- prohibit the *use* of land or *buildings* for any *use* that is not specifically permitted by the By-law;
- prohibit the erection or siting of *buildings* and *structures* on a *lot* except in locations permitted by the By-law;
- regulate the type of construction and the *height*, bulk, location, size, floor area, spacing, and *use* of *buildings* or *structures*;
- regulate the minimum *frontage* and *depth* of a parcel of land;
- regulate the proportion of a lot that any building or structure may occupy;
- regulate the minimum elevation of doors, windows or other openings in *buildings* or *structures*;
- require parking and loading facilities be provided and maintained for a purpose permitted by the By-law; and,

- prohibit the *use* of lands and the erection of *buildings* or *structures* on land that is:
 - subject to flooding;
 - the site of steep slopes;
 - rocky, low-lying, marshy or unstable;
 - contaminated;
 - a sensitive groundwater recharge area or head water area;
 - the location of a sensitive aquifer;
 - a significant wildlife habitat area, wetland, woodland, ravine, valley or area of natural and scientific interest;
 - a significant corridor or shoreline of a lake, river or stream; or,
 - the site of a significant archaeological resource.

How to Use This By-law

In order to reference this By-law most easily, a property owner should follow each of the steps listed below to determine what permissions apply to their particular property.

1. Table of Contents

The provisions of this By-law have been numbered using a decimal system of numbering and are referred to as "sections" regardless of the number of digits, for example section 2, section 2.17, section 2.17.1. Some sections are divided into clauses, for example 4.14 (i) is referred to as clause i) of section 4.14. Some are further divided into sub-clauses, for example 4.14 (i) (a) is referred to as sub-clause a) of clause i) of section 4.14.

Wherever reference is made in this By-law to "section 1", "section 2", "section 3", "section 4", "section 5", or "section 6", etc., it shall be deemed to be a reference to all sections having, respectively, 1, 2, 3, 4, 5 or 6, etc. as the first digit.

2. Locate the Property on a Map

Maps in a Zoning By-law are called 'Schedules'. The first step to using this By-law is to refer to the *zone* schedules that are contained at the back of the By-law to determine in which *zone* category your property is located. The *zone* category will be indicated on the schedules by a colour and in some cases a symbol or abbreviation. For example, you may see a light shade of yellow colour with a symbol such as "RLD" beside your property. This would indicate that your property is within the 'Residential Low Density' *Zone*. The *zone* symbols or abbreviations are explained on the first page of Section 2 of the By-law.

Section 2 also provides assistance to help you identify the *zone* boundaries on the Schedules. For example, if your property appears close to a *zone* boundary and you are not sure how to determine exactly where that boundary is located, refer to Section 2.5 of the By-law.

3. By-law Amendments

A Zoning By-law is not a static document; it is amended over time as demands and policies governing land *use* change. Before proceeding any further, you should verify that your property is not the subject of an earlier Zoning By-law amendment. These amendments are listed in the Special Provisions Section of this By-law. More recent amendments may not be included in the

version of the By-law you are using. Staff in the Town's Planning Department will be able to assist you to confirm if your property has been subject to a more recent By-law amendment.

4. Zone Provisions

The next step to using this By-law is to determine what *uses* are permitted on your property. Sections 6 to 12 of the By-law identify the permitted *uses* and *zone* standards for each *zone* in the municipality.

The definitions in Section 3 can assist you if you are not sure of the nature of a permitted *use* or how it has been defined for the purposes of this By-law. Words that are defined in Section 3 are *italicized* throughout the By-law.

If a word is not italicized, it is not specifically defined. *Uses* which are not identified as permitted *uses* within a particular *zone* are not permitted in that *zone*. Where a definition is not defined in this By-law, the Merriam - Webster dictionary definition will apply.

You have now identified the *zone* in which your property is located and have identified what *uses* are permitted on your property. The next step is to determine what standards may apply to the *uses* on your property. Sections 6 to 12 of the By-law also identify the *zone* standards for each of the *zone* categories in the municipality including standards for minimum *lot area*, minimum *frontage* requirements, minimum *yard* requirements, maximum *lot coverage* for *buildings*, maximum permitted *height of buildings* and in some cases, the minimum required *landscaped open space* on the *lot*.

5. General Provisions

Now that you are aware of the *uses* permitted on your property and the specific *zone* standards that apply to those *uses*, reference should be made to Section 4 of this By-law. Section 4 contains a more generic set of standards known as 'General Provisions' that apply to all properties in all *zones* throughout the municipality. For example, the general provisions contain standards that regulate the location of *accessory structures* on a *lot*, *height* exceptions, and *non-conforming/non-complying uses* that apply to all properties regardless of where in the municipality a property is located.

6. Parking and Loading

There is one final section of the By-law that should be consulted when determining what permissions apply to your specific property. Section 5 provides the parking and loading requirements for all *uses* permitted in the municipality. If you are considering changing the *use* of your property or adding a new *use* to your property, you should review Section 5 to ensure that you are aware of the parking requirements for the proposed *use*.

7. Explanatory Notes

A series of drawings are provided in the back of this document to assist the reader in interpreting the Zoning By-law provisions. These drawings are for illustration purposes only and do not form part of the actual By-law.

What are *Legal Non-Conforming* and *Legal Non-Complying* For The Purposes Of This By-law?

A *legal non-conforming use* is a *use* of land and/or *building* that legally existed on the date that a prohibiting By-law came into effect under the Planning Act. To be legal, the *use* must have been permitted on the lands in the zoning by-law that was in effect before the prohibiting By-law came into effect. Alternatively, if the *use* has existed on the lands for a considerable number of years, the *use* may be *legal non-conforming* if it was legally established before the first By-law for the Town of Milton or the By-law for the original Township was passed.

A legal non-complying *building* or *structure* is a *building* or *structure* that was legally erected in a location prior to a prohibiting By-law coming into effect under the Planning Act. To be legal, the location of the *building* or *structure* must have been authorized on the lands in the zoning by-law that was in effect at the time the building or structure was erected. Alternatively, if the *building* or *structure* existed on the lands for a considerable number of years, the *building* or *structure* may be legal if it was legally erected before the first by-law for the Town of Milton or the by-law for the original Township was passed.

Description of By-law Components

This By-law contains fifteen sections, which together, provide the land *uses* and standards applicable to all lands within the municipality. These sections are as follows:

SECTION	TITLE
Section 1	Interpretation and Administration
Section 2	Establishment of <i>Zones</i>
Section 3	Definitions
Section 4	General Provisions
Section 5	Parking and Loading Provisions
Section 6	Residential <i>Zones</i>
Section 7	Commercial <i>Zones</i>
Section 8	Employment <i>Zones</i>
Section 9	Institutional <i>Zones</i>
Section 10	Section Not in Use
Section 11	Natural Heritage and Open Space <i>Zones</i>
Section 12	Future Development <i>Zones</i>
Section 13	Special Provisions, Holding Provisions, Temporary Use <i>Zones</i> & Interim Control <i>Zones</i>
Section 14	Enactment
Section 15	Schedules

The purpose of each of these sections is described below.

Section 1 – Interpretation and Administration

This section of the By-law specifies:

- what lands are covered by the By-law;
- that every parcel of land in the area covered by the By-law is to conform and comply with the By-law; and,
- what penalties can be levied against a person or a corporation if they contravene any provision in the By-law.

Section 2 - Establishment Of *Zones*

This section establishes the *Zones* that apply to the lands covered by the By-law. This section also describes how to determine the location of the *Zone* boundaries on the schedules.

Section 3 - Definitions

It is necessary to define words in a Zoning By-law because it is a legal document. A By-law must be drafted so that it can be enforced in a court of law. These definitions will help provide clarity in the By-law and ensure that the By-law and its intent are applied consistently.

Section 4 - General Provisions

This section contains a number of regulations that apply to certain types of *uses*, *buildings* or *structures* regardless of where in the municipality or in what *zone* they are located. For example, this section contains provisions dealing with the construction of *decks* in any *zone*, or provisions to regulate the operation of home industries.

Section 5 – Parking and Loading

Parking and loading facilities are required for almost all *uses* within the municipality. This section provides the requirements for these facilities including such regulations as the number of spaces required for residential and commercial *uses*, minimum *driveway* width, minimum *parking space* size and the location of parking facilities on a *lot*.

Sections 6 to 11– Zone Provisions

Sections 6 to 11 identify the *uses* that are permitted in each *Zone* category. The effect of these *Zones* is to only permit certain *uses* in various parts of the municipality. The only *uses* permitted in a *zone* are those that are specified in the By-law. If a *use* is not specifically mentioned as a permitted *use* in a *Zone* then it is not permitted. Similarly, if a *use* is defined in Section 3.0 of the By-law but does not appear as a permitted *use* in any *zone*, then it is not a *use* permitted by the By-law.

Sections 6 to 11 also contain a number of regulations that control the placement, bulk and *height* of a *building* on a *lot*. This includes regulations such as minimum *lot* size, minimum *frontage*, maximum *building height* or the maximum coverage of a *building* on a *lot*.

Finally, these sections contain a listing of property specific exceptions to the By-law that have been granted by *Council* for individual or groups of properties. For example, the minimum *front yard* in a *zone* may be 7.5m. The required *front yard* may be reduced to a lesser number if deemed appropriate and the mechanism to accomplish this reduction is by amending the By-law and excepting the property from the general standard. Exceptions are denoted on the *Zone Schedules* by the *Zone* symbol designating certain lands followed by a star and a number, for example RLD*1.

Section 12 – Future Development Zone

This section identifies lands which have no immediate development potential, however the lands indicated by this *zone* will ultimately be rezoned to permit some form of urban development in the future once the required secondary plans and development plans among other matters have been approved.

Section 13 – Special Provisions

This Section provides a consolidated list of properties that are subject to Special Provisions, Holding Provisions, Temporary *Use Zones* and Interim Control By-laws.

Section 14- Enactment

This section contains the signatures of the Mayor and the Clerk who signed the By-law when it was passed by *Council* in accordance with Section 34 of the Planning Act, R.S.O. 1990 c.P. 13.

Section 15- Schedules

This section contains the schedule(s) mapping that forms part of this By-law
