## Section 1 Executive Summary

As one of Canada's fastest growing municipalities, Milton Transit plays a significant role providing a safe and reliable mobility option to residents and visitors. Driven by customer need, expectation, corporate policies and Provincial legislative requirements, a forward-thinking, accessibility presence remains a priority for Milton Transit.

### **Accessibility is for everybody!**

To promote Milton Transit as a viable transportation option, all customers must have access. The commitment to purchase fully accessible transit fleet over the past 15 years is a significant step in this direction. However, overall system accessibility consists of components beyond accessible transit buses, including:

- Increased service levels
- GTHA service and fare integration
- Barrier-free pedestrian connections
- Accessible/hard surface bus stops
- Passenger amenities (e.g. shelters, wayfinding, etc.)
- Responsive snow clearing standards
- Availability of accessible transit information
- Supportive operational programs, policies and customer service

For many, Milton Transit is the primary means of travel to and from work, school, medical appointments, community events and social activities. As Milton Transit accessibility improves, everyone benefits.

The purpose of the Transit Accessibility Plan is to identify barriers and establish strategies to address local accessibility issues and any regulatory requirements in 2023. Consistent with requirements under the Integrated Accessibility Standards Regulation (IASR) 191/11, this plan will undergo public consultation to discuss and assess progress toward full system accessibility.

### **Milton Transit is committed to:**

- the continuous improvement of accessible public transit services;
- including people with disabilities in developing/reviewing the annual accessibility plan, in parallel with the Town's multi-year accessibility plan;

- providing accessible services to customers, employees and contractors; and
- optimizing municipal investments to provide the right service for individuals (e.g. door-to-door specialized transit, ondemand transit, accessible conventional services, etc.).

DRAFT

## Section 2 Milton Transit Services Profile

Milton Transit delivers conventional, ondemand and specialized transit services. Tables 1, and 2 provide a summary of operational profiles.

### Conventional Service - 2021 Service Profile

Table 1: Summary of Conventional Transit Service

Criteria	Description
Type of service	Fixed route, interlined - radial service at the Milton GO Station terminal (780 Main Street East). Alternative Service Delivery (ASD) via Milton Transit OnDemand.  Contracted operation provided by Diversified
Hours of service	<ul style="list-style-type: none"> <li>Monday to Friday 5:20 am to 10:11 pm</li> <li>Saturday 7:10 am to 7:40 pm</li> </ul>
Annual passenger boardings	<ul style="list-style-type: none"> <li>247,399</li> </ul>
Number of fixed routes	<ul style="list-style-type: none"> <li>9 regular fixed routes</li> <li>4 school extra routes</li> </ul>
Types of services	Fixed-route service, school extras, OnDemand service
Fleet composition	<ul style="list-style-type: none"> <li>17 accessible heavy-duty, conventional buses</li> <li>4 accessible medium-duty buses</li> </ul>

## Specialized Service - 2021 Service Profile

Table 2: Summary of Specialized Transit Service

Criteria	Description
Type of service	<p>Shared ride, door-to-door, pre-booked service for eligible residents and visitors. Registrants are able to book trips up to seven (7) days in advance.</p> <p>Contracted operation provided by Diversified Transportation (PWTransit Canada) using dedicated mini-buses.</p>
Hours of service	<ul style="list-style-type: none"><li>• Monday to Friday 5:20 am to 10:11 pm</li><li>• Saturday 7:10 am to 7:40 pm</li></ul>
Annual passenger trips	<ul style="list-style-type: none"><li>• 12,107</li></ul>
Fleet requirements	<ul style="list-style-type: none"><li>• 6 accessible mini-buses</li></ul>

## Section 3 Previous Accessibility Achievements

Milton Transit has executed many accessibility initiatives over the last several years, along with the development and enhancement of policies and procedures. As a result, many of the requirements set out in the ISAR 191/11 have been implemented ahead of regulatory compliance dates. Milton Transit continues to update policies, procedures and services to improve accessibility, reliability, connectivity and enhance customer mobility options.

The following accessibility improvements have been completed:

### Conventional Transit

- Purchased fully accessible buses. All conventional transit buses have been 100% accessible since 2009. These buses include accessibility features such as high contrast stanchions/handrails, illuminated external electronic destination signs, stop request buttons/pull cords, slip resistant flooring and the clear identification of priority and courtesy seating areas (ongoing).
- Installed bus stops, shelters and accessible landing pads at a variety of bus stop locations throughout the service area (ongoing).
- Installed updated static departure/scheduling information at all bus stops (ongoing).
- Constructed a designated 'transit only' lane on Drew Centre, at the Milton GO Station, used for safe passenger boarding and alighting (2012).
- Installed and implemented electronic visual and audible announcement and pre-board announcement equipment (2016).
- Identified support persons and removed fare requirement (2014).
- Made available accessibility equipment information on Milton Transit web page, [www.miltontransit.ca](http://www.miltontransit.ca) (2014).
- Implemented and expanded Open Data to support trip and journey planning across the Greater Toronto and Hamilton Area (ongoing).
- Installed and launched onboard vehicle surveillance system (2021).

### Specialized Transit

- Developed and implemented centralized reservation process, same-day booking process, and established no-show/cancellation policies (2014).

- Aligned specialized transit service area with conventional service area, while maintaining access to all eligible residents within municipal boundaries (2013).
- Implemented updated eligibility procedures for the specialized transit application process (ongoing).
- Introduced categories of eligibility as part of the eligibility process under the eligibility criteria for specialized transit services (2017).
- Established an independent in person eligibility and appeal process (2016).
- Committed to a Memorandum of Understanding (MOU) with all Greater Toronto and Hamilton Area (GTHA) specialized transit service providers to accept registrants and associated service connections (2016).
- Introduced dedicated specialized services with Town-owned accessible transit fleet (2020)
- Launched optimized scheduling application, with phone, mobile and online booking availability (2021).

## **Administration and Policy**

- Updated Milton Transit website with greater opportunities for increased customer service and accessible display of transit information, policies and programs (ongoing).
- Use of Milton Transit social media, including Twitter and Facebook (ongoing).
- Launched travel training app Magnusmode (2020).
- Established and updated corporate accessibility policies (ongoing).
- Implemented emergency preparedness, response and evacuation procedures for operators of conventional and specialized transit service (ongoing).
- Implemented fare and service parity in parallel with accessible conventional services (2012).
- Developed criteria, policies and procedures for service use by visitors and registrants from other municipalities for specialized transit services (2013).
- Developed associated policies and procedures for the communication of service delays and travel with companions and children on specialized transit services (ongoing).

- Participated on the Ontario Public Transit Association (OPTA) Accessibility Committee and GTHA Accessibility Working Group, providing for the collaborative sharing of best practices among Ontario transit systems with respect to achieving accessibility specifically in regard to IASR 191/11 requirements (ongoing).
- Launched mobile fare payment and e-ticketing solution (2020).
- Launched Milton Transit OnDemand services (2021).

## 2022 Work Plan Progress

The 2022 Accessibility work plan consists of administrative, service-related and infrastructure rehabilitation projects. The following table provides a summary of actions and progress to date:

Actions	Progress to Date
1. Continue to improve infrastructure at bus stops and other related transit infrastructure. Install bus pads and shelters at various locations.	In progress.
2. Finalize the rollout of Milton Transit branding on new bus stop signs, ensuring sign visibility and legibility.	In progress. To be completed by December 2022.
3. Implement service improvements to maintain service reliability, improve coverage.	In progress. Service reintroduction and growth planned for September 2022.
4. Implement new, dedicated specialized service delivery model to accommodate growth and enhanced customer service.	Completed. Dedicated service implemented and expanded. Replacement vehicles ordered and delivery planned for October 2022.
5. Continue mobile fare payment pilot and e-ticketing solution.	Completed. New mobile fare payment app through Token Transit implemented.
6. Install transit shelters at a number of bus stop locations throughout town.	Postponed to 2023 in alignment with updated transit advertising contract.
7. Implement and expand Alternative Service Delivery (ASD) Strategy, Milton Transit OnDemand.	In progress. Milton Transit OnDemand launched in September 2021 and planned to be expanded in Boyne and Derry Green in September 2022.

8. Initiate replacement of specialized transit scheduling/booking software. The new system will provide specialized transit customers with better access to reserving trips, including online booking options.	Completed in 2021 and refined in 2022.
9. Formalize transfer connections with Halton Hills ActiVan and Peel TransHelp.	In progress. Connection established with Halton Hills ActiVan in May 2022 at the First Ontario Arts Centre Milton (FOACM). Connection with Peel TransHelp planned for September 2022.

## Section 4 2023 Accessibility Work Plan

The following provides a summary of the actions planned in 2023 that will make Milton Transit more accessible:

- Continue to improve infrastructure at bus stops and other related transit infrastructure. Install accessible bus pads at various locations.
- Install transit shelters at a number of bus stop locations throughout town.
- Reintroduce transit services to pre-COVID levels.
- Implement service improvements to maintain service reliability, improve coverage.
- Introduce an Ambassador Program to highlight and support mobility options for youth.
- Update Fare Policy; review opportunity to support means-based fare programming.
- Initiate Milton Transit Service Review and Master Plan Update to define future service requirements.

## IASR 191/11 Transportation Compliance Initiatives

There are no compliance initiatives in 2023 specific to transportation services. For further details related to corporate IASR 191/11 compliance initiatives and subsequent work plans, please refer to the 2023 - 2028 Town of Milton Multi-Year Accessibility Plan.

It is important to note that the availability of sustainable resources contributes to the pace of progress for reducing or eliminating accessibility barriers. If resource constraints exist, prioritization of initiatives is required. While it is important to focus on the removal of barriers, it is equally important to recognize the vast steps taken in a relatively short timeframe.

DRAFT

## **Section 5 Methodology for Plan Review and Update**

Consistent with requirements from the IASR 191/11, the 2023-2028 Town of Milton Accessibility Plan provides guidance for the 2023 Milton Transit Accessibility Plan. The Transit Accessibility Plan details accessibility initiatives that reflect IASR 191/11 compliance as well as supporting the continuous removal of accessibility barriers. Improvements are reported annually and are used to measure progress and develop subsequent work plans.

There are two (2) key inputs to the Transit Accessibility Plan, including:

1. Legislative and regulatory requirements and associated compliance timelines
2. Customer feedback and annual public consultation

The 2023 Milton Transit Accessibility Plan feeds directly into business practices as well as annual capital and operating budget recommendations.

## **Section 6 Process for Managing, Evaluating, Taking Action on Customer Feedback**

Customer feedback is important to measure the pulse of the transit system and identify areas for service improvement. The following sections outline the process for receiving, managing, evaluating and taking action on customer feedback.

### **Receiving Feedback (Customer Generated)**

Feedback from customers (positive, negative or neutral) serves as key inputs to Milton Transit's service delivery and annual service plans, including those elements dealing specifically with accessibility.

The Customer Service Information Centre (operated by the transit service provider) receives feedback related to service operations, whereas Town staff receive planning and administration-related feedback for review and response. Corporate response policies outline how customer feedback is retained and responded to. Customers and residents can provide comments in a number of formats, including: telephone, in person, mail, email, website and social media accounts (Facebook and Twitter). In all cases, when a customer has made an inquiry or requested a response, Milton Transit staff replies to the customer in the same format the inquiry was received.

Upon receipt, staff forward service requests to the appropriate area for review and response. In the event that a request can be acted upon outside of the service planning process, appropriate action is taken and the customer is advised accordingly.

The service provider completes all investigations and actions on recorded complaints, as appropriate. Customers who request a response to a complaint are advised of the investigation and response timelines for actions. Categorization of complaints received support trend analysis and whether new programs, policies and services require further examination.

The contracted operations supervisor (or designated) acknowledges all compliments received about Milton Transit service delivery employees in the form of an open memo or letter for the quality customer service they have provided.

### **Gathering Feedback (Milton Transit Generated)**

Milton Transit uses a number of methods to gather feedback from customers, including:

- Online feedback engagement tool - Let's Talk Milton - as required
- Online surveys via Milton Transit web page - as required
- On-board surveys - as required
- Town committees - as required
- Peer consultations - ongoing
- Service Plan development and process - annually
- Service Reviews - as required
- Transit Master Plan development and process - approx. every five (5) years

All information collected assist in making recommendations and adjustments for service improvements.

## Section 7 Process for Estimating Demand for Specialized Transportation Services

The process to identify service demand requirements for specialized transit services includes an analysis of factors and influences which can vary over time. These factors include:

- Historic ridership trends and growth analysis on both conventional and specialized transit services.
- Eligibility criteria for specialized services, noting given requirements under IASR 191/11 involving transition to categories of eligibility in 2017.
- Accessibility levels of conventional transit services, including: accessible bus/service availability and associated stops and amenities. This factor also depends on the extent to which specialized transit customers can use accessible conventional service when possible, as well as the level of service connectivity that exists between conventional and specialized services.
- The location of key origins and destinations within the Milton Transit service area and their proximity to one another, including the Milton GO Station, older adult homes, medical facilities, rehabilitation facilities, medical offices, Milton District Hospital and major retail areas (primary origins and destinations for specialized transit customers).
- Local demographics and trends.
- Anticipated changes to local policies and procedures.

Further analysis of ridership and demand forecasting provides input into the annual budget process. It is important to note that at any point in time, the impact level of these factors vary, and as such, determining demand for specialized services is an ongoing exercise.

## Section 8 Steps to Reduce Wait Times for Specialized Transportation Services

Specialized transit customers consistently identify on time performance as a high priority. As such, Milton Transit retains a dedicated service contractor that provides on demand taxi services (within established time parameters) as well as Town-owned dedicated bus services, which include same day service. However, there are a number of factors that impact service wait times. These factors include, but are not limited to:

- Traffic conditions caused by weather conditions, road construction, train crossings, etc.
- Site issues from drop-off locations (e.g. automobiles parked in designated drop-off locations)
- Customers not ready for their pick-up in their pick-up window
- Late cancellations and no shows (e.g. customers who do not take their scheduled trip and do not cancel in advance triggers the service provider to wait an additional five (5) minute past a scheduled reservation (policy driven), which may impact future consecutive trips)

A contracted centralized reservationist approved and implemented in 2014 has provided further control and monitoring of scheduled trips, with emphasis on addressing trip no shows and other procedural obligations to minimize customer wait times. Additionally, the implementation of scheduling/dispatching software has provided further information to assist in improving scheduling and subsequent operations, with the ability to measure system performance. Further service delivery adjustments planned in 2023 will continue to address on time performance, using Town-owned, dedicated specialized transit vehicles.

## Section 9 Procedures to Address Equipment Failures

### Conventional Transit Services

Conventional transit fleet requirements are determined based on the number of buses required during peak operating periods, including buses that require inspections and maintenance - referred to as spare fleet ratio. This ratio can vary significantly given factors of age and make/model of the fleet noting that while older buses may require higher levels of maintenance to keep them operating efficiently, newer buses tend to have more electronic-related failures.

There are a number of actions taken to mitigate in-service breakdowns, including the following:

- Operators submit daily bus defect reports to maintenance staff at the end of service day for follow-up prior to bus redeployment.
- Every evening when buses are serviced (refueled, farebox emptied, etc.), employees review typical operational components. In the event that an issue is discovered/identified, technicians complete the repair immediately, or remove the affected bus from next day service (for future maintenance).
- Each day, prior to a bus pull out from the garage, operators complete a pre-trip inspection and circle check, ensuring that the bus is functioning properly. This check includes various accessibility features on the bus (i.e. ramp, kneeling feature, mobility securement equipment, etc.). If there are any non-functioning equipment, operators will attempt to have the issue repaired prior to entering service. A replacement bus is assigned for occurrences when repairs cannot be complete in time.

While these actions mitigate in-service breakdowns, they do not eliminate them. When a bus defect disables the bus while in service, Milton Transit initiates the following procedures:

- Bus operator contacts dispatch and relays the defect information.
- Dispatch determines the extent of the defect and identifies a change-off location and estimated time.
- In consultation with maintenance staff, dispatch arranges for a replacement bus.

These procedures can be impacted by severe weather events or other vehicle issues that could result in the inability to replace all affected buses (e.g. severe weather conditions affecting the functionality of the bus ramp or kneeling features).

## **Specialized Transit Services**

In accordance with municipal By-Law 94-2004 as amended, as well as the established demand responsive contract with the current specialized transit service provider, any accessible vehicle that incurs breakdown must be repaired as soon as practicable. Additionally, the service provider is required to request an accessible vehicle from another broker to accommodate the trip.

DRAFT
